

Technical Assessment – Full Stack Developer (WordPress)

Project: WELSGLOBAL eBooks

Objective

This technical assessment is designed to evaluate your ability to work within an existing WordPress website and independently deliver a production-ready eCommerce solution.

The assessment evaluates your frontend development, backend development, UI/UX design, WordPress knowledge, payment integration, workflow design, attention to detail, speed of execution, testing, and overall product quality.

Assessment Tasks

Part 1 – Redesign the

eBooks

Page

Redesign the following page:

<https://welsglobal.com/ebooks/>

The redesigned page should align with the existing **WELSGLOBAL Brand Guidelines** and provide a premium, modern, and seamless shopping experience.

Objectives

Your redesigned page should:

- Present a clean, modern, premium interface.
- Improve product presentation and browsing experience.
- Create a stronger visual hierarchy.
- Use consistent typography, spacing, colors, and button styles.
- Include clear product information and strong call-to-action buttons.
- Be fully responsive across desktop, tablet, and mobile devices.
- Follow WordPress and Elementor best practices.
- Be production-ready.

You may use **Elementor**, custom PHP, custom CSS, JavaScript, or other WordPress-compatible solutions where appropriate.

Part 2 – Redesign the Checkout Page

Redesign the checkout experience to provide a fast, intuitive, and trustworthy purchasing journey.

The redesigned checkout should include:

- Modern and professional layout.
- Easy-to-understand checkout flow.
- Professional order summary.
- Clear payment method selection.
- Mobile-first responsive design.
- Trust indicators to increase buyer confidence.
- Consistent WELSGLOBAL branding.
- Production-ready user experience.

Part 3 – Design & Implement the Payment Workflow

Implement the complete purchase workflow supporting both payment methods.

Payment Methods

- Cryptocurrency (Crypto-to-Crypto)
- Credit / Debit Card (CC Avenue)

Cryptocurrency Payment Workflow

Design and implement the complete workflow below.

Example Workflow

1. User selects an eBook.
2. User proceeds to Checkout.
3. User selects **Cryptocurrency** as the payment method.
4. User selects the cryptocurrency.

Examples:

- USDT
- Bitcoin (BTC)
- Ethereum (ETH)

5. Display the payment information:

- Wallet Address
- QR Code
- Network
- Payment Amount

6. User completes the cryptocurrency transfer.

7. User submits:

- Full Name
- Email Address
- Transaction Hash / Transaction ID

8. Store the transaction securely in WordPress.

9. Display a successful submission confirmation.

10. Admin reviews and verifies the transaction.

11. Once payment has been verified:

- Generate the order.
- Send a purchase confirmation email.
- Automatically email the purchased downloadable eBook (or a secure download link) to the buyer.
- Send an admin notification confirming the completed purchase.

Credit / Debit Card Payment Workflow

Integrate **CC Avenue** as the payment gateway.

The workflow should include:

1. User selects **Credit / Debit Card**.
 2. Payment is processed securely through CC Avenue.
 3. Payment confirmation is received.
 4. Record the completed transaction.
 5. Generate the order.
 6. Automatically send the purchased downloadable eBook (or a secure download link) to the buyer via email.
 7. Send a purchase confirmation email.
 8. Notify the administrator of the completed purchase.
-

WordPress Requirements

Your solution should integrate properly with WordPress and follow best practices.

Examples include:

- Elementor
- WooCommerce (if applicable)
- Custom PHP
- WordPress Hooks & Filters
- Custom Fields
- WordPress Database
- Secure Form Validation
- Email Notifications
- Admin Management
- Plugin Compatibility

Technical Requirements

Candidates should demonstrate proficiency in:

WordPress

- Theme customization
- Elementor
- WooCommerce
- Custom PHP
- Plugin integration
- WordPress Hooks & Filters
- Performance optimization

Frontend

- HTML5
 - CSS3
 - JavaScript
 - Responsive Design
 - UI/UX Best Practices
 - Modern eCommerce Design
-

Backend

- PHP
- MySQL
- WordPress Database
- Payment Gateway Integration
- Email Integration
- Secure File Delivery
- Secure Form Processing
- Error Handling

Deliverables

Please submit the following:

- Updated WordPress files or custom plugin/theme files.
- Any custom PHP, CSS, and JavaScript developed.
- Installation instructions.
- README documentation.
- Screenshots of the completed pages.
- A **5–10 minute video walkthrough** explaining your implementation, workflow, and design decisions.
- A live demo (preferred, if available).

Evaluation Criteria

Criteria	Weight
UI / UX Design	20%
WordPress Development	20%
Frontend Development	15%
Backend Development	15%
Payment Workflow & Integration	10%
Speed & Productivity	5%
Code Quality & Best Practices	5%
Responsiveness	5%
Documentation & Communication	5%
Total	100%

Speed & Productivity (5%)

Candidates will be evaluated on their ability to manage their time effectively and deliver high-quality work within the expected timeframe. We value developers who can work efficiently without compromising functionality, code quality, testing, or attention to detail.

This criterion considers:

- Time management
- Ability to prioritize tasks
- Efficiency in problem-solving
- Timely completion of deliverables
- Balancing speed with quality

Important Notes

- This assessment should reflect your own work.
- AI-assisted development tools may be used; however, you must fully understand and be able to explain every part of your implementation.
- We are evaluating your ability to deliver a **production-ready solution**, not simply complete the requested tasks.
- The eBook should be delivered **automatically via email after successful payment verification**. The downloadable file or download link must be secure and should not expose public file URLs.
- The assessment evaluates both the **quality of your work** and your ability to **complete it efficiently within the agreed timeline**. Delivering production-ready solutions on time is an important part of the evaluation.
- Attention to detail, code quality, testing, usability, security, and consistency with the WELSGLOBAL brand are all important factors in the evaluation.
- You are encouraged to improve the overall shopping and checkout experience beyond the minimum requirements wherever appropriate.

Bonus (Optional)

Additional consideration may be given for implementing:

- One-page checkout.
- Order history for customers.
- Email receipt with professional branding.
- Automatic invoice generation.
- Secure, expiring download links for purchased eBooks.
- Download tracking (number of downloads).
- Admin dashboard for managing eBook orders.
- Order status updates (Pending, Paid, Delivered).
- Smooth animations and micro-interactions that enhance the user experience without affecting performance.
- Additional UX improvements that simplify the purchase journey.

Good luck! We look forward to reviewing your submission and seeing your approach to building a seamless, secure, and production-ready eBook purchasing experience for WELSGLOBAL.
